

THE UBUNTU HOME COLLECTION

Ubuntu Eco Gardens

A collection of considered homes.

UBUNTU ECO GARDENS

Homes shaped by natural materials, generous light and a strong relationship with the landscape. Each design offers a different expression of contemporary eco living.

The homes.

Every Ubuntu Eco Gardens home is built by our approved contractors and designed with the Ghanaian environment in mind.

Our collection begins with rammed earth construction, with further options expanding to earth interlocking blocks and other considered building methods as the development evolves.

Each home has been carefully designed to a high standard, responding to the local climate, landscape and way of life while maintaining the quality, comfort and character expected of an Ubuntu Eco Gardens home.

BEYOND THE HOMES

Ubuntu Eco Retreat

An off-grid, back-to-nature getaway for people who want to slow down, reconnect and experience a different way of living.

A slower way to arrive.

Set around a growing food farm, alongside a café and farmers' market, Ubuntu Eco Retreat sits within the wider Ubuntu community — a place to experience life off the grid, surrounded by nature, food production and an emerging way of life.

This is more than accommodation. It is an opportunity to slow down, and to see the wider Ubuntu vision taking shape.

FOR

Families · Couples · Solo Travellers · Nature Lovers · Explorers
Those seeking a peaceful escape · Anyone curious about off-grid living

Quiet. Relaxing. Serene. Natural. Simple. Connected.

ECO-LODGE OWNERSHIP

Own a place within the Ubuntu vision.

There will also be opportunities to own an eco-lodge within Ubuntu Eco Retreat — as a holiday home, a short-term rental, a personal retreat, or a property within a growing eco-tourism destination.
